

Ried Rosengartel ^{1ÖTW} Riesling 2020

Vintage: The year began with an exceptionally dry winter without the usual water reserves being built up. And also spring started not only dry, but also exceptionally warm. However, there was neither late frost nor lasting problems due to the initially low water supply. The later beginning of spring led to well-balanced precipitation with medium to warmer temperatures. An overall very pleasant summer for the vines encouraged the development of more intense fruit notes in the grapes. Since September was also showing its best side, the harvest started again relatively early in order not to achieve too high sugar levels for our lighter wines. It was very noticeable this vintage, that the

Bisamberg with its loess soils showed much earlier maturity than the Nussberg with its heavier shell limestone and primary rock soils. At the beginning of October there was a lasting change in the weather. Suddenly the glorious late summer was over, cool temperatures, repeated rain and tough early morning fog made the harvest very difficult. Fortunately, the vines with their grapes were now at such a high physiological maturity that the rain and the damp fog in particular could no longer affect the quality. In late October we waited patiently, sometimes for several days, to continue with the harvest. The completion only succeeded towards mid-November, as late as it had not been for a long time. 2020 appears surprisingly balanced and of high quality, with an elegance that we would not have expected before the harvest.

Soil: The Nussberg has always been the most famous vineyard in Vienna, and the Rosengartel is located right in its center. This fillet piece of the Nussberg is planted with ancient vines, which produce a particularly mineral and multi-faceted Riesling and thus express the terroir of Vienna's Nussberg in an excellent manner. The soil here mainly consists of extremely lime-rich weathering of limestone and sandstone with a medium proportion of clay.

Vineyard and Cellar: After careful grape selection by hand picking in the last days of October and a careful sorting out of botrytis, the healthy grapes were gently destemmed and after about five hours of maceration at very cool temperatures carefully pressed with a pneumatic press. The fermentation with naturally occurring yeasts took place 100% in the steel tank. After a few months of storage of the finished wine on the lees, it was bottled in June 2021.

Tasting Notes: Fine floral honey on the nose, nuances of yellow tropical fruit, smoky mineral touch, fine peach fruit in the aftertaste. Rich, elegant, fine stone fruit nuances, delicate acidity structure, hint of salinity. A fine and multifaceted wine with great aging potential.

Wine Data: Alcohol 13.5 % vol., Acidity 6.2 g/l, Residual Sugar 2.0 g/l
